

# Assistive Technology Showcase

**Date** Tuesday 4<sup>th</sup> June 2024  
**Time** 10.00 – 13.00  
**Venue** Enfield Civic Centre, Conference room

This event will be held in a public space within the Civic Centre, and we encourage partners to advertise this opportunity as widely as possible in order that a large audience of Enfield's residents, carers and Adult Social Care professionals have a chance to see first-hand the technologies that support independent living.

We will showcase a variety of innovative assistive technology (AT) devices and highlight how technology you could be using could have a positive impact on the quality of life of vulnerable adults in the community; please come and visit us to find out more.

## What do we mean by Assistive Technology?

Assistive Technology, also referred to smart technology or technology enabled care, are devices or systems that support people in their everyday lives to be as independent as possible. This can include mobile phones and more specialised equipment.

## What Assistive Technology is available?

Technology is changing all the time – but some common devices are: -

- Calendar clock with alarms and pictures that play personally recorded voice messages.
- Movement sensors that will play personalised message.
- Voice Assistants.
- Environmental Sensors.
- GPS or tracker alarms.
- Bed, chair and door sensors.
- Fall Sensors.

# Meet the exhibitors:

- **ENFIELD SAFE & CONNECTED – Web link:** [Enfield Safe and Connected | Enfield Council](#)
