About Digital Support

Our goal is to help older people make the most of the digital world through programmes that increase skills and the confidence they need to lead an included and independent life by helping them keep in touch with loved ones, access services or information on the internet and pursuing hobbies.

Be social with us

Our Services

Group sessions- This group will support individuals living with dementia and carers to develop and learn skills to get online and utilise technology to enhance their wellbeing and increase independence.

1:2:1 support- These sessions can be arranged to support your individual technology needs via online learning, drop in sessions at a local Age UK site or our digital assistance clinic .

Tablet loan scheme- Often it is access to a device which is a barrier to technology. Our tablet loan scheme offers you the opportunity to explore and develop your IT skills with a 3 month loan scheme.
