

## The Dementia Clinic

If you or a loved one is worried about memory loss or dementia, we are here to offer expert help and support.

# Age UK West Sussex, Brighton & Hove has launched a new dementia clinic in Brighton.

**This service will help people who are concerned about memory loss or dementia in themselves or a loved one. Family members and carers can also get in touch.**

The clinic offers access to tailored support, expert assessments, and guidance for people concerned about dementia. Early diagnosis and management are key, and we're here to help at every stage.

We will review an individual's situation and provide appropriate assistance, for example, someone may want to remain independent at home, they might be seeking an NHS dementia assessment, or they may need advice on disability benefits.

We have teamed up with our partner, Here, to provide a clinical diagnosis and tailored one-to-one support. Together we will guide people through the process and be there to answer any questions. The clinic offers a not-for-profit paid for service at a fair price, ensuring accessible help and expert diagnosis with personalised care throughout.

## About Here

Here is a not-for-profit healthcare provider. For over a decade, it has been dedicated to delivering high-quality dementia services built on the values of clinical excellence and compassion.

## Contact the Dementia Clinic
